

You are the center of attention

At MedSelect GmbH, holistic care revolves around you. As a communicative bridge in the world of medicine and science, we network:

- **Doctors**
- **Product manufacturers**
- **Food supplement manufacturers**
- **laboratories**
- **Experts**

Our aim is to promote the exchange of knowledge, develop successful therapies and pass them on - all based on data.

Why?

Because we want to help people.

All too often, the treatment of causes is neglected in medicine, as symptom-oriented pharmaceutical and health insurance concepts dominate. We want to change this - together with you!

WE ARE HERE FOR YOU
For prevention and chronic illness

What is Toxopheresis®?

Toxopheresis® is an innovative method of detoxifying your body.

The aim of Toxopheresis®

is to clear the body of harmful toxins, heavy metals and pathogens so that it can regain its natural tolerance to stress and its ability to regulate and function properly.

When is Toxopheresis® used?

- **Diseases** such as chronic illness & exhaustion, vascular calcification, metabolic diseases, autoimmune diseases, unexplained illnesses and many more.
- **Preventively** to prevent disease.

Think you are healthy? Then get tested for disease-causing substances as a preventative measure. Protect your health in the long term & feel an improvement in your wellbeing.

Advantages of Toxopheresis

- Reduction of circulating immune complexes
- Reduction of inflammatory messages
- Reduction of viral load
- Reduces borrelia, bacterial & fungal toxins
- May improve energy production (ATP)
- Is gentle & well tolerated
- Is both therapy & prevention
- Seals the blood-brain barrier
- Improves blood flow

Also removes **fat-soluble environmental** toxins such as toluene, pesticides and insecticides (glyphosate, DDT), PCBs, DDE, benzenes, solvents, paints, silicones, microplastics and more.

Removes **autoimmune antibodies**, circulating immune complexes and inflammatory messengers (cytokines, interleukins, haptens)

Removal of heavy metals WITHOUT the use of chelating agents to minimize the risk of allergies or side effects.

The Toxopheresis® process

The process takes place in a **closed blood circuit**. First, your blood is separated into blood and plasma in a filter. The plasma is then cleaned in a second filter and returned to your body with the blood.

CAUSE

Anamnesis required in advance:

- Full physical examination
- Blood analysis
- Urine & stool analysis if required

DETOXIFICATION

Side effects of Toxopheresis®

- Slight drop in blood pressure during treatment, rare
- Tiredness
- Slight swelling of the eyelids or hands/feet

SOLUTION

From 14 years, from 40kg
