

You are the center of attention

At MedSelect GmbH, holistic care revolves around you. As a communicative bridge in the world of medicine and science, we connect:

- **Doctors**
- **Product manufacturers**
- **Nutritional Supplement Manufacturer**
- **Laboratories**
- **Experts**

Our goal is to promote the exchange of knowledge, develop successful therapies, and disseminate them - all based on data-driven foundations.

Why?

Because we want to help people.

Too often, the treatment of underlying causes is neglected in medicine, as symptom-oriented pharmacy and health insurance concepts dominate. We want to change that—together with you!

WE ARE HERE FOR YOU
For Prevention and Chronic Illness

YOUR PATH TO HEALTH
We have the experts for you

Frequency Chip Therapy

Using a special process, electromagnetic frequencies are applied to frequency chips, which are then absorbed by the organism when applied to the body.

Without chemical ingredients, this method directly influences symptoms of ailments through electromagnetic fields at the cellular level from the outside.

Chelation Therapy

Toxic metals in the body can be a burden on the entire organism and may cause significant health impairments, especially to the immune and nervous systems.

To specifically remove harmful metals from the body, chelation therapy offers a fast and gentle solution.

Toxopherese®

An innovative therapy is gentle blood purification through a double filtration process.

The goal of Toxopherese® is to cleanse your body from burdensome toxins, heavy metals, and pathogens to restore its natural tolerance to stressors, as well as its regulatory capacity and functionality.

Data Analysis

Proof of effectiveness must be determined individually for each patient through laboratory tests.

Detailed analyses to determine the right therapy and monitor abnormal values during and after treatment (e.g., inflammation markers, toxic metals, etc.) form the foundation.

Autologous Serum / Cell Therapy

This therapeutic approach utilizes the body's own cells to stimulate the healing process of damaged and diseased cells:

- Tissue cells
- Muscle cells
- Gland cells

and many more.

Due to its remarkably good tolerability, autologous serum can be used diversely across various applications.

BodyBalance

- Nutrition
- Metabolism
- Digestion
- Stress
- Grief
- Anxiety
- Intolerances
- Exercise
- Environmental toxins

Together, they form a comprehensive picture of physical (dis)satisfaction and (un)balance.
